

## Focus on Healthcare

**NCF** donated more than 1,950 units of pharmaceuticals, surgical items, and hospital equipment to the Sequele District Health Centre, logistics aligned with Prince Farma.

NCF believes health is key to success and freedom . While we believe everybody to have access to quality health care services, both at hospitals and at community clinics, its those small steps that set the foundation of all such thoughts!

We offer a credible, accountable channel to make a direct difference in the health and wellness of the community we serve, through innovative, people-centric, results-focused initiatives. The projects we support may include contributions to health and healthcare infrastructure, human capacity development, medicine support among other areas of healthcare.

The Foundation is committed to accountable stewardship, good governance and transparent reporting.

Volunteers of NCF are encouraged to dedicate time in identifying all such opportunities in provinces that lack training or essentials. NCF also partners with Embassies to attend to similar objectives.
