

NCF provides economic support to the youth

NCF programs focus on providing comprehensive training and support to especially abled youth through a combination of training based and institutional-based approaches, including career opportunities, job offers, and soft skills development. The goal is to promote the growth and development of these individuals through the implementation of effective Training Modules that follows international best practices and utilizes innovative educational technology and teaching methods.

Noble Care Foundation works towards empowering the differently abled community through various activities and initiatives throughout the year.

This initiative also makes it easier to track beneficiaries' financial and physical success at all levels of implementation, including different zones in the province. NCF has planned to roll-out similar programs up-country too in the later part of 2024.
