

NCF supports victims of flood in Huambo

NCF responds to the call of the flood victims in Huambo, a far off province in Angola. Offering food supplies and basic shelter material to the residents of the province. The support adequately covered the risk of children from insect bites, while medicines, medical supplies, , anti-bacterial cream, and nutritional supplements covered the rest.

Moreover, with over 30 primary and secondary schools having been fully or partially damaged as a result of the floods, NCF's timely support prepared the basic infrastructure to carry out other support services in the area by the local authorities. More than 400 people benefitted from this support.
