

## Partnering with Stakeholders

**Noble Care Foundation** partners with stakeholders, including Banks and other similar institutions, a following common objective of serving and empowering the community. These partnerships are primarily focused on Orphanages. On a rotational basis, these activities are designed to cover different locations and provinces in Angola.

When mothers and caregivers face extreme poverty, illness, or social exclusion, they may feel compelled to give up their children as a life-saving act. This is where, NCF joins other stakeholders in running short programs protecting such children in crisis, and restore them to their families.

The possibility that orphans will escape the vicious cycle of poverty and make a positive difference in the world improves when we show them love, take care of them and provide them with the necessities like food, and basic necessities. NCF's support for orphanages and orphans helps advance children's empowerment, literacy, and wellness to a great extent, wherever we design such support programs.
