

Prostate Cancer Awareness

Noble Care Foundation runs every year campaign on Prostate Cancer.

NCF campaign in November is primarily focused on sensitizing men between the age of 40 and 50 years to know what Prostate cancer is all about, and often doesn't present with symptoms. Knowing whether one may be at risk can help him identify early signs of the disease. When prostate cancer is diagnosed in the early stages, doctors have more options to determine appropriate care and improve patient outcomes.

NCF brings specialists and doctors in this area to enlighten men and ways to prevent its occurrence. NCF first focuses internally in the organisation (Noble Group) and then the community for sensitizing men. NCF follows a planned calendar of events related to Prostate campaign.

NCF can proudly confirm, more than 2,000 men have benefited from this dedicated campaign every year, that we call NCF-Blue November.
