

Noble Care Foundation rehabilitate and renovates school at El-Betel

NCF reconstructed and renovated a school at El Betel, that was in dilapidated, it's a school for orphans, that house more than 70 children. Every child deserves equal opportunity to accessing education, especially with infrastructure. Small but assuring steps taken by NCF provides hope.

Both learners and teachers waited in despair, hoping that one day, their school building could be given a new facelift to befit a basic classroom. NCF renovated the six-unit classroom block of the school, replaced the classroom doors, plastered the blocks, completed the design blocks constructions, and also painted the entire school.

It was dream they banked their hopes on and backed it with fervent requests on a regular basis with local authorities and other stakeholders, but in vain. It was indeed a dream 'come true' for the children and the teaching staff.
